

Changing Labels ... New Labels from Heritage!

Redesigned to Meet Evolving Requirements

Heritage's labels were recently redesigned to improve their functionality and usability. New features include:

- Improved regulatory content – Conforms with current DOT and EPA requirements with additional fields available for State specific information
- Heritage continues to update all labels to conform with the EPA Generator Improvements Rule
- Only one label stock – eliminates wasted stock and errors caused by mismatching the label stock with the printed content
- Ready for EPA's e-manifesting program – the uniform hazardous waste manifest may be replaced, but waste labels won't be. These labels will carry the information needed
- Multi-use format – format and content consistency between all label types that can be used for accumulation and/or shipping purposes
- Improved readability – larger font sizes and spacing to improve reading at a distance
- Improved size – smaller size allows convenient use on smaller containers without overlapping other labels
- PDF document type - enables easier mobile and on-site printing from a wider range of economical printers
- Bright colors – retains the industry best practice of using a color indicator keyed to the material type

HAZARDOUS WASTE	
NA3077	
FEDERAL LAW PROHIBITS IMPROPER DISPOSAL. If found, contact the nearest Police or Public Safety authority or the U.S. Environmental Protection Agency.
